Hiring Manager
C/O Personal Assistant

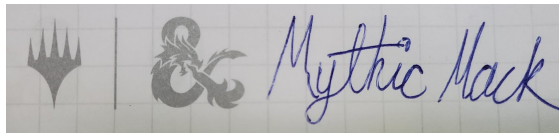

To introduce myself, my name is Kristen Mack. Some of your staff may remember me as a software engineer from Geek & Sundry/Legendary Digital. Our mutual contacts led me to an Angellist listing for a software engineering position at your company. We were introduced because you want to find a candidate who is efficient, that can save you time, that knows the industry, that can engineer solutions, be discreet but communicate clearly, and stay out of the way of production.

My five years of Fullstack Web Development experience must be of interest to you. I live locally, right here in Los Angeles, and I am sure I can maintain for you an organized, sensible archive of the herculean stack of content you produced, without losing the ability to find files fast so that productions stay on schedule.

I am also known as the software engineer responsible for presenting live cartoon voice-sync technology solutions to Geek & Sundry. I engineered the integration method that G&S/Legendary Digital Networks used to create live animation content, such as the animated Dick & Johnson segments. My work saved the crew months of animation time, as we produced single hour episodes in as little time as an hour. After working with many clients, all expressed that they are impressed with my abilities to solve tech issues on a time crunch. My software engineering solutions are still in use at Geek & Sundry. In short, I know how to work behind the scenes to provide solutions so that production can meet its goals, while still interacting unobtrusively with key personnel so that everyone can do what they need to do without interruptions that cost lost time.

And take care of yourselves out there. I care about you all.

Best wishes,

Mythic Mack

KRISTEN MACK

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in interactive animation software. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a compassionate media company with global reach to make a positive impact on the future.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Unannounced Dog App (Fullstack Web App & Associated Media) – Users interact with digital dogs

Dolley--Madison Archive Project (4TB media archive) – Users could login to their profile and find their media. They can backup large amounts of media through an input that triggers a python script, which they can then edit or delete all media in their profile.

100Hours YouTube Project – The World's Largest Dungeon converted to Pathfinder

Other Projects: Mythicide.com, Hey! Burnt Wood video management across Twitch Youtube Vimeo Facebook & Twitter, Community manager moderator bot at Fangirls Anonymous, Amani Jewelry Facebook content management.

Freelance Software Engineer at Unannounced Dog Project | Los Angeles, CA

January 2019 — Present

Created organized digital media archive, fullstack stack web applications and static websites for different clients across small and medium size businesses. Consulted on SEO and social media strategy. Some clients included:

Actual Client – Jordan Byrne

Freelance Software Engineer at Legendary Digital Networks | Los Angeles, CA

January 2018 — June 15, 2018

Saved the Geek & Sundry team thousands of man hours by engineering a live animation method. The method is still being used in their productions today.
